Company Overview

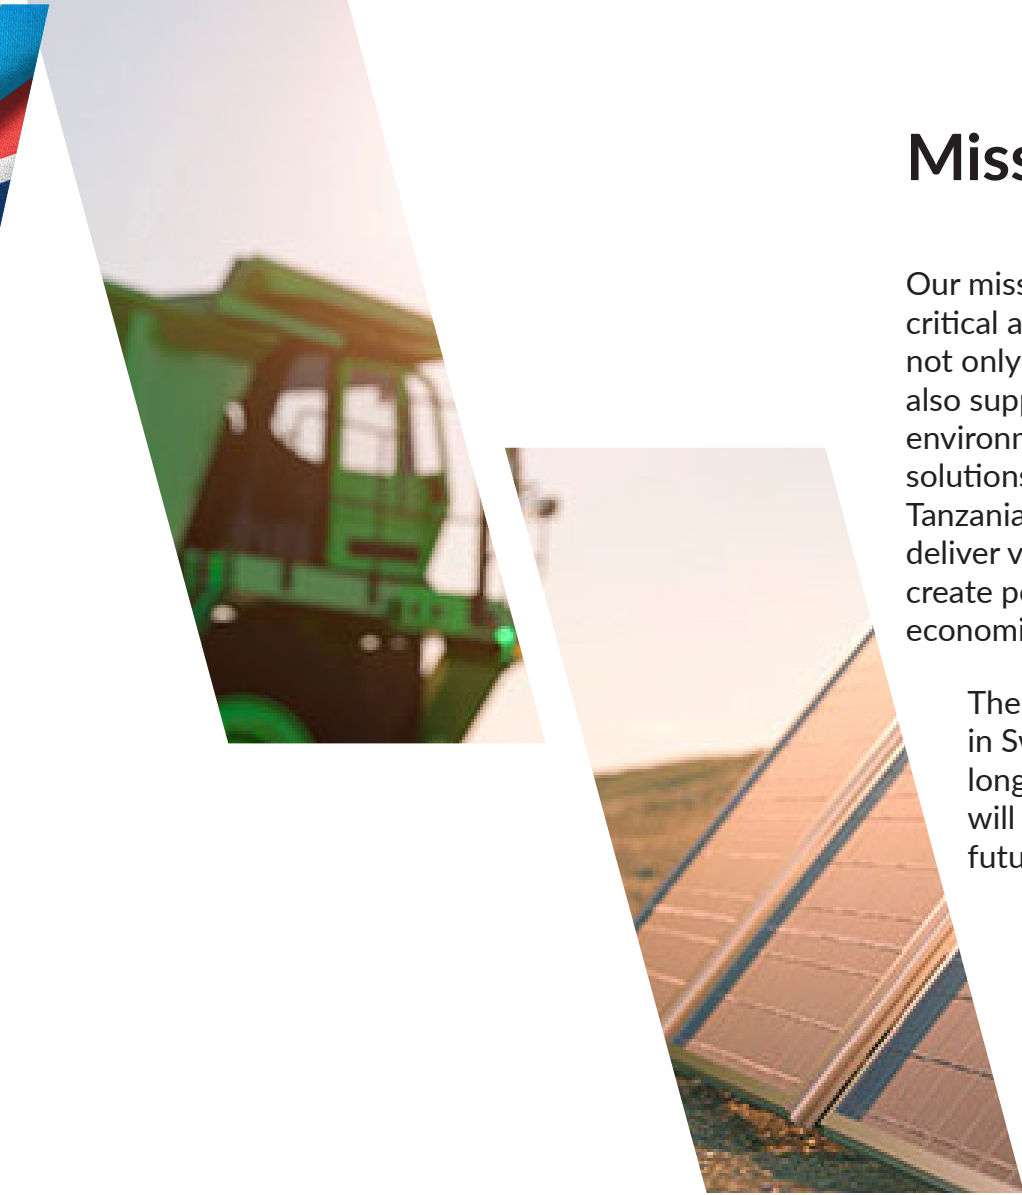

Vijanatz Industries Ltd. is a Tanzanian mining company specializing in the exploration and development of a diverse range of mineral deposits.

The company own several licenses, including Prospecting Licenses (PLs), Primary Mining Licenses (PMLs), and Mining Licenses (MLs).

These licenses cover 17 different minerals, spanning metallic, industrial, and energy-related resources.

Together, they encompass a significant area, spread across various regions of Tanzania

Mission Statement

Our mission is to explore and develop critical and strategic mineral resources that not only contribute to economic growth but also support social advancement, environmental stewardship and clean energy solutions. We aim to harness the potential of Tanzania's rich mineral landscape to deliver value to all our stakeholders and create positive impact across financial, economic, social, and environmental spheres.

The name "Vijana", which means "youth" in Swahili, reflects our mission to foster long-lasting sustainable development that will empower communities and benefit future generations.

Vision Statement

Our vision is to be a leading force in the mineral industry, known for our commitment to sustainable practices and local economic development. We strive to create a legacy of positive impact that will benefit future generations.

Partnership & Collaboration

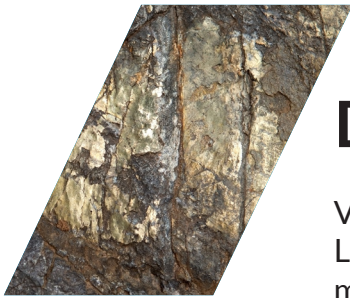

We are seeking to engage with financial or strategic investors to partner with us in the development of our mining activities. Our initial focus will be on exploration, and we are particularly interested in investors willing to participate in exploration programs.

We are also seeking to establish relationships with mining equipment suppliers and secure access to export credit financing.

In the long term, our goal is to collaborate with mining companies interested in forming lasting partnerships to develop these resources into operational mines.

We are open to establishing joint venture companies or royalty-based agreements to achieve this.

Deposits under Development

Vijanatz Industries Ltd. holds Prospective Mining Licenses (PL), Primary Mining Licenses (PML) and Mining Licenses (ML) for several metallic, industrial and energy mineral deposits shown in the list below.

We are actively seeking partners to invest in exploration and to assess and realize the value of these deposits.

01

Metallic Minerals

- Gold
- Lead
- Lithium
- Nickel
- Niobium
- Tantalite
- Tin
- Tungsten
- Wolframite
- Zinc

02

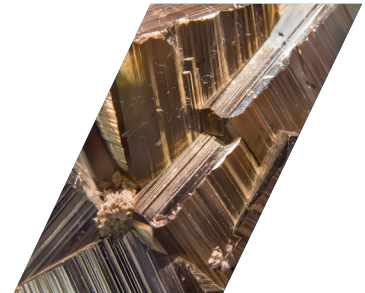

Industrial Minerals

- Black and White Dolerite Granite Stone
- Gypsum
- Iron Ore
- Limestone
- Rare Earth

03

Energy Minerals

- Coal
- Uranium

Opportunities for Partners

Exploration and Extraction

Engage in the exploration and extraction of critical minerals, leveraging advanced technologies and sustainable practices.

Financial Collaboration

Partner with us to raise and manage funds essential for large-scale mining operations.

Sales and Distribution

Collaborate in the marketing and sale of minerals, tapping into global markets.

Why Partner with Us?

Based in Tanzania, with offices in Dar Es Salaam and Dodoma, a country with vast untapped mineral resources.

Sustainable Practices

A commitment to sustainable mining and social responsibility.

Experienced Leadership

Backed by a strong team with expertise in mining, finance, and sustainable development.

Community Focus

Dedicated to creating jobs and fostering development in local communities. We reinvest in agricultural development initiatives that will benefit future generations.

The Business Development Team

Peter Masika

CEO and founder

Social Entrepreneur, chairman, and main shareholder of the Vijanatz Industries Ltd, holding over 20 mining licenses covering 350 square kilometers in Tanzania.

Matthias Kuntze

Investor / Advisor

CEO and Entrepreneur, Chairman and main shareholder of the Savor Group, providing employment to over 2,000 People in Burundi and Tanzania.

Dr. Richard Masika

Director

Shareholder in Vijanatz Industries Ltd., and Licensed Consulting Engineer. Former Rector of Arusha Technical College, known for enhancing academia-in-dustry ties. With a Ph.D. in Civil Structural Engineering, he brings deep expertise in civil-mining engineering, technical training.

Ari Magnus Mathiesen

Investor / Advisor

Founder and owner of Willing Hands AS, a group of companies from Norway focusing on the sustainable design and development of entire aquaculture value chains in Africa. It has projects in 7 African countries and is currently expanding into sustainable manufacturing and mining.

Paul Mwakajumba

Director

Director of Vijanatz Industries Ltd, Business Consultant with valuable experience in international business relations.

Georges Ortman

Investor / Advisor

Entrepreneur and former Ernst & Young consultant with 6 years of experience in East Africa and 10 years in Europe.

A large yellow excavator is shown in the process of loading a white dump truck with a bucket full of brown soil. The truck is parked on a dirt road at a mining or construction site. The background features a bright blue sky with scattered white clouds. The excavator's arm and bucket are in the upper left, while the truck is in the center. The ground is uneven and covered in dirt.

The Exploration & Mining Team

James Sullivan - Lead Geologist

James specialises in exploration geology and has over 27 successful years in the mineral exploration and mining industry in Australia and internationally, with a focus on Africa.

James is a Member of The Australian Institute of Geoscientists (MAIG) and holds Registered Professional Geologist (RPGEO Mineral Exploration) accreditation, he is also a Member of the Australian Institute of Energy.

James' passion is remote early-stage exploration and Archean Greenstone hosted gold mineralisation, Orogenic/ Intrusion-related mineralisation including Porphyry copper/ gold, Rare Earth Metal, and Uranium exploration discovery.

He has been involved in the discovery of several global-scale mineral deposits through being first on the ground, and re-interpretation of these projects. James has acted as Competent Person reporting requirements for publicly listed companies.

The Exploartion & Mining Team

Israel Daud John

Geologist

Geologist Pit Mapping and logging including both (Geological, Geochemical, and Geophysical logging). Experience in grade control, ROM Management, Blasting, Orebody definition, and geomodelling (design, planning, and scheduling).

Godfry Tara

Geologist

Godfrey, a seasoned Tanzanian geologist and geophysicist, has a decade of expertise in oil, gas, and mineral exploration. He is part of the Exploration & Mining Team, focusing on advanced seismic data interpretation, subsurface analysis, and sustainable mining practices in Tanzania and Japan.

Hood mallah

Geologist

Exploration geologist with over 3 years of experience prospecting for mineral resources in multiple geological terranes within Tanzania. He has been involved in various grassroot and advanced exploration projects in Tanzania. His experience spans across a variety of commodities including uranium, strategic minerals (lithium, graphite, nickel), copper and gold.

Sandra Ngweshemi

Geologist

With over three years of experience in site and office geology, Sandra specializes in Uranium, Phosphate, Lithium, Gold, and groundwater exploration. Currently a Hydrogeologist at RUWASA in Dodo-ma, she coordinates groundwater exploration, supervises drilling, prepares borehole reports, and advises water sector experts on hydrogeological matters.
